Objective

I.T Professional with over 7 years of experience in cross-functional management, business, and application development, aiming to excel as an IT Applications Manager. Reinforced by AWS, CompTIA and Full Stack Development credentials, driven by continuous learning, and significant progress through an undergraduate in Computer Science. Administering robust proficiency in cutting edge Cloud IaaS, SaaS, PaaS and agile methodologies, combined with strong foundations and experience in project management, emotional intelligence and business acumen. This predisposition aligns IT solutions with stakeholder needs, fostering team development and ensuring milestones are met on budget and within scope while adhering to extended multi-year roadmaps. By leveraging this blend of expertise the realization of the company's mission: delivering updated, cutting-edge, low risk, IT services, while consistently demonstrating the highest ethical and collaborative standards, is realized.
